

# MAGNA GEL™

## Nutritional Supplement for Supplying Additional Magnesium and Calcium for Beef and Dairy Cattle

Since you can't control nature, your best choice to supplement magnesium is Magna Gel. Magnesium serves a variety of vital functions in the body. Inadequate levels of magnesium in the diets of grazing animals can cause a serious disorder known as "Grass Tetany."

Succulent spring grasses, fall regrowth pastures, winter annuals and poor quality hays often do not contain adequate concentrations of magnesium, and must be supplemented to achieve optimal performance

### Why Magna Gel?

- Formulated for quick absorption
- Ready-to-use
- No milk withdrawal when used on dairy cattle
- Can be used on adult cattle and calves

# MAGNA GEL™

## Nutritional Supplement for Supplying Additional Magnesium and Calcium for Beef and Dairy Cattle

---

### GUARANTEED ANALYSIS:

Unless otherwise stated, values are minimums

Magnesium	2.0%
Calcium (max)	0.6%
Calcium	0.1%

### INGREDIENTS

Magnesium chloride, dried cellulose, Propylene glycol, Glycerin, Calcium chloride, Methyl paraben (preservative), Propyl paraben (preservative), Potassium sorbate (preservative), mint green color.

### DIRECTIONS FOR USE

Dairy and Beef Cattle:

Give two tubes daily as condition requires

Hold animal's head in a slightly elevated position. Insert the nozzle of syringe through the interdental space and quickly squeeze product to the back of the animal's mouth. Hold mouth closed until the product is swallowed. Do not use a rope or restraint that could choke the animal.

### STORAGE AND SAFETY

Use extreme caution to prevent injury to mouth or throat tissue; do not allow the animal to chew on the tip of the tube, which can result in mouth lacerations.

This product is intended for intermittent or supplemental feeding only.

Store in a cool dry place. Do not feed to animals with mouth or throat sores. Keep out of reach of children. For livestock use only. Use only as directed. Not for human use. For veterinary use only

### CAUTION:

Contact with the skin, wounds or can cause irritation, flush with warm water if exposed.
