

PET-EMA® & FELINE PET-EMA®

Single Disposable Enemas

When you need an easy-to-use, safe enema for feline or canine patients, Pet-Ema® provides a convenient, non-toxic solution designed specifically for veterinary practices.

Each 12 mL Pet-ema syringe contains a solution of dioctyl sodium sulfosuccinate 250 mg, glycerine and Sorbic acid (as a preservative).

Dioctyl sodium sulfosuccinate acts to soften stools by facilitating movements of water into fecal mass; glycerine helps lubricate the rectal wall. Pet-Ema also helps stimulate the mucosa of the lower bowel and rectum.

Why Pet-Ema?

- Two sizes to choose from
- Cost effective
- Easy to use

Each 6 mL Feline Pet-Ema syringe is designed specifically for cats

PET-EMA[®] FELINE PET-EMA[®]

Single Disposable Enemas

PET-EMA[®]

12 mL syringe enema for dogs and cats

INGREDIENTS

Each syringe contains 12 mL of a solution of dioctyl sodium sulfosuccinate 250mg in glycerin, with sorbic acid (as a preservative)

USES

As an aid in the relief of constipation; and in re-establishment of normal bowel function in post-operative patients

DIRECTIONS FOR USE

Remove tip cap and gently insert nozzle into rectum. If desired nozzle can be lubricated prior to insertion. Slowly depress syringe plunger to express contents. Treatment may be repeated in one hour if necessary.

STORAGE AND SAFETY

Not for human use

For rectal use only

For Veterinary use only

Keep out of the reach of children

Store in a cool dry place
