

Vetadryl[®] Diphenhydramine HCl Tablets

The Diphenhydramine Formulated Exclusively for Veterinary Use.

Veterinarians rely on diphenhydramine (DPH) for its sedative and antiemetic effects for conditions such as motion sickness and as an aid in both allergy management and atopic dermatitis. But DPH capsules formulated for humans can be expensive and difficult for pet owners to administer. Vetadryl[®] diphenhydramine HCl gives you an option for cats and dogs that is palatable and costs just pennies per tablet.

- FEATURES:**
- Flavor-tested: preferred 7x more than diphenhydramine capsules*
 - Formulated exclusively for veterinary use
 - Manufactured in two strengths and scored for flexible dosing
 - Priced competitively with generics

- BENEFITS:**
- Can be given as a treat, making administration easy
 - Sold/dispensed in the clinic to retain control of patient care
 - Readily available and convenient for the pet owner to take home and administer
 - Clients save money over human-labeled product without sacrificing results

Vetadryl[®]: chewable tablets at the generic's price

Vetadryl 30 mg **250 ct** = \$9.30 = \$0.04 per **tablet**

Generic 25 mg **100 ct** = \$2.60 = \$0.03 per **capsule**

Based on current average distributor list price (September, 2017)

► 250-count bottles for in-clinic dispensing and 30-count bottles for pet owners to take home

Recommend the flavored, chewable tablet, not the capsule. Recommend Vetadryl.
