### Persistence and degradability

- Etofenprox is not readily biodegradable. Methoprene degrades rapidly in sunlight, both in water and on inert surfaces. The pesticide also is metabolized rapidly in soil and does not leach. Thus, it should not persist in soil or contaminate ground water.

### Bioaccumulative potential

- No data available

### Mobility in Soil

- (s)-Methoprene: 10-14 days, rapidly hydrolyzed in soil.

### Other adverse effects

#### Potential Environmental Effects

- No data available.
